Danish King Valdemar's Sailing Route Description

(English by Google)

From utlensi to calm X ukæsio. Then up to the skægge nes II ukæsio. From here to waldø IV and if you like to go along the land side you can go from waldø to runø. And it is distant from Waldø to Iukæsio. From there to klineskær, uel diuræholtsnub I. From there to geishammer I. From there to roxhammer I. From there to æfra From then until winø I

Of the calamari up to 9 days. From here until winø III. From here until the spores III. From here on, 2 hambræ and one with hambræ. From here to askø I and through askø I and from askø to quetnæ I. From here to ørsund II. From here to wæggi I and through wæggi I. From here to ulfsund I. From here to rotæsund I. From there to alrecki II. From here until Brawic I. Brawic lasts for a long 6 ukæsion.

First, when he passed across the Brawic, he encountered a certain island called Winterclasse, and then Alør. Then he roared. Then rinse. Then he licked. Then ask Then the ræueskiær. Then the thoræ. Then the hammer. Then until Mæthelstein II. From there until Alæsnap II. From then until gardø II. From there until windø I and with windø II and windø towards the south lies the rudmi.

From there I went. Then they methelsten. Then they danced. Then oil it. Then the ornaments. Then he went down. Then I went to bed.

Then strømsø. From there Then the sand Then brown.

From there From there he came. From there, From there my

From there særø. Then the husarn Then enlang Then the lancer. From then on Then the finør. From there he left. From there the hoxhals From there the widør From there you recover. Then Arholm.

And beyond Brawic to Fimersund II. From there to ørscbac, to rugø I. From there to stendor sund. Thenceforth they are siuia. From there to hafø I. From there to fifang I. From there to swether sund I. From there to ekiholm I. From there to aslæsund I and through aslæsund I. From there to ikernsund I. From there to gardø I. From there to dalernsund I. From there to haricstik I From there to little swethiuthæ I. From there to stokholm I

De little swethiuthæ usque wiræsund I. Inde usque malægstak I. Inde usque krampe sund III. From there to Weddesund I. From there to Arholm II. And it must be noted that the process from Utlensi to Arholm is slower to the north than to the east.

De arnholm transmare aland usque lynæbøte VI. From there until thiycækarl VIII. It is to be noted that

australem plagam et proxima mari. De aspæ usque ørsund VI. Inde usque hangethe III. Et notandum est quod de arnholm usque lynæbøte itur medio inter orientem et aquilonem et si prosper est uentus ab occidente potest uelificari directa linea de arnholm usque hangethe et de hangethe que finnice dicitur cumiupe usque lowicsund II. Inde usque karienkaskæ I. Inde usque iuxarö II. Inde horinsaræ quod danice dicitur hestø II. Inde usque purkal III et ad hanc insulam de hangethe itur uersus orientem et aliquantulum tamen uersus aquilonem. Item de purkal usque narigeth ultra mare estonianum VI. Inde usque karlsø I et dimidia. Inde usque ræuelsburg dimidia. Et notandum quod de purkalæ usque ræuelsburg uelificandum est inter australem plagam et orientalem.

Pretera notandum est quod si placet potest uelificari de hangethe usque hothensholm cum uento aquilonis uersus australem plagam et orientalem. Atque ibi habet mare VIII ukæsio.

between Thiycækarl and Lynæbøte there is a lot lying on an island called Fyghelde. From there to aspæsund 6 and there are three islands, one of which is aspæ, the second is refholm, the third is malmø, and the last one lies on the right side of them towards the southern side and next to the sea. From aspæ to ørsund VI. From there until hangethe III. And it must be noted that from Arnholm to Lynæbøte it goes midway between the east and the north, and if the wind is favorable from the west, a direct line from Arnholm to Hangethe and from Hangethe, which is called cumiupe in Finnish, to Lowicsund II, can be sailed. From there to karienkaskæ I. From there to juxarö II. Hence the horinsare, which in Danish is called hesto II. Thence to Purkal III and to this island from Hangethe it goes towards the east and still a little towards the north. Also from Purkalæ to Narigeth beyond the Estonian sea 6. From there until Karlsø 1 and a half. From there to Ræuelsburg half. And it is to be noted that from Purkalæ to Ræuelsburg it is necessary to veil between the southern quarter and the eastern one.

Furthermore, it is to be noted that if it pleases it can be sailed from Hangethe to Hothensholm with the north wind towards the south side and the east. And there he has a sea of 8 ukæsia.
